

DESCRIPTION

OFF—Shore Power model 1015 is an Isosynchronis AC Generator specifically designed for the motion-picture and television industry. Precision electrical output is achieved using three separate digital controls. However, operation is as easy as two switches.

SPECIFICATIONS

Physical Dimensions-

Length- 56 inches
Width- 30 inches
Height- 38.25 inches
Weight- 1105 lbs, wet with fuel

Engine Type- Internal Combustion

Fuel- Diesel #2, Bio-Fuel certification pending

Aspiration- Turbo Charged

California Air Resource Board and EPA tier 4, effective year 2013, interim certified

Output Connections-

Camior E-1016- Standard, 5 connections, reversed ground included
Bates 100amp- 2 ea, Standard, (Limited to 40amps)
Eddision 20amp- 2 ea, Standard

Output @ 120/240 Volts VAC- 9.8KW Intermittent
8.0KW Continuous

Fuel Consumption with 15 Gallon Fuel Tank

Load	Running hours
100%	12 hours
50%	24 hours

Noise Level-

Approximate
52 DB (A) at 50 Feet

Cooling-

Water Cooled with centrifugal fan.

Transportation Options-

Fork Lift Pockets with external tie-down are standard. Trailer mounted and handcart options are available.

1 Single axle trailer (not included) Weight- 595 lbs
